

iCubeRevo

CONNECTING PEOPLE TO DIGITAL HOME ENTERTAINMENT

Web interface with iPod or iPhone

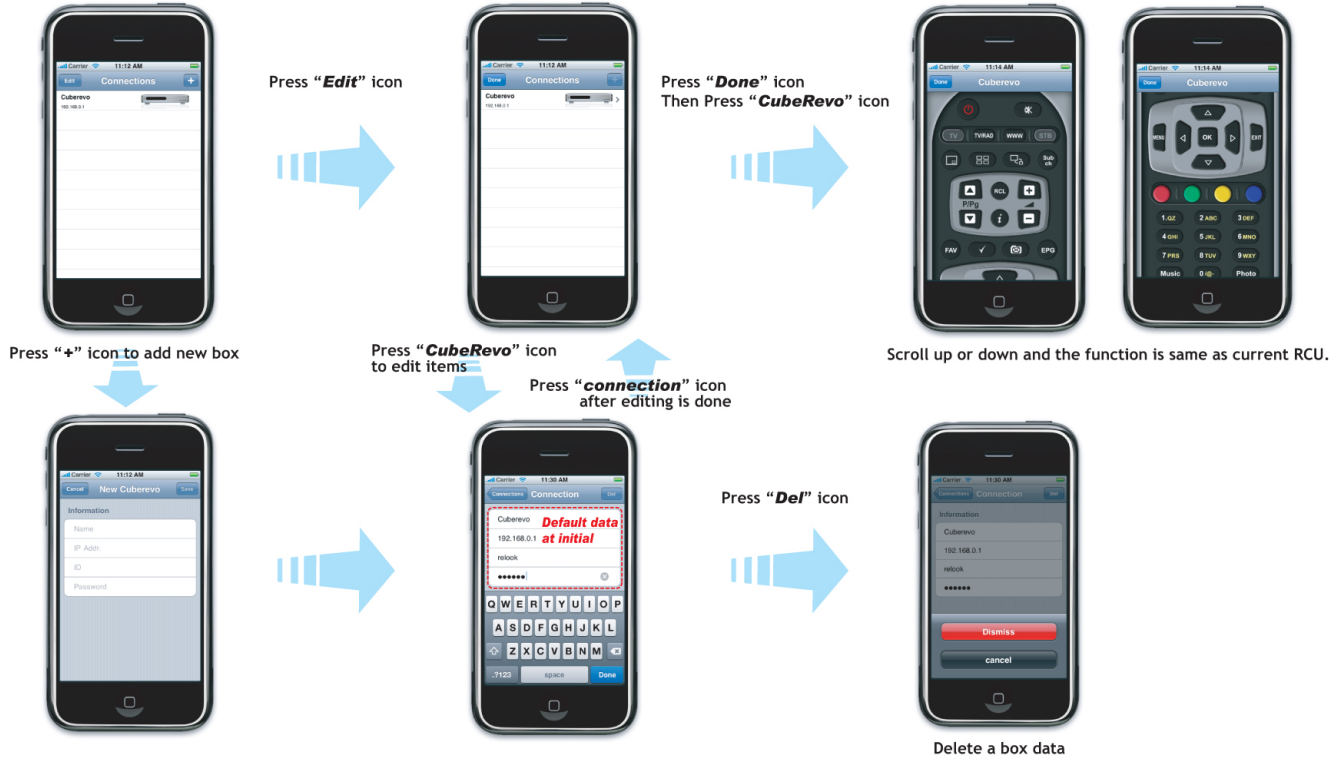

This function is basically working through WiFi system, therefore, your iPod and CubeRevo should be connected each other through *normal WiFi network system* directly, otherwise, you should need *Wireless router* in home

1. Download "iCubeRevo" function from Apple site for using "iTunes" on Windows or Mac System
2. Upload "iCubeRevo" to proper terminal such as iPod or iPhone.
3. Press "iCubeRevo" icon on touch pad of iPod

4. Instruction

5. Other function such as sending/receiving Photo data will be expanded step by step.
